

**Faculty Positions in Computer Science, Department of Computer Science, University of North Carolina, Chapel Hill, United States.**

The Department of Computer Science at the University of North Carolina at Chapel Hill invites applications for several tenure-track assistant professor positions in the department, to begin on or after July 1, 2019. Applicants should show evidence of exceptional research promise and teaching potential. This is a broad-area search for multiple positions with interests including, but not limited to, robotics, natural language processing, machine learning, computer graphics, virtual reality, augmented reality, visualization, systems, computational biology, and bioinformatics.

Founded by Turing Award winner Fred Brooks, the department has an outstanding research tradition as one of the oldest computer science departments in the United States. In addition to excellent support for new faculty, there is a long-standing tradition of encouraging and fostering collaborative research both inside the department and across the university, including extensive collaboration with biological sciences and the medical school. The department also hosts numerous programs for the broader North Carolina community with over a thousand community members participating in a series of hackathons, lab visits, and other outreach activities each year.

The University of North Carolina at Chapel Hill has been rated in the top five public universities in the United States for the last 18 years by U.S. News & World Report. The university is located within the Research Triangle, home to a wide range of technology, science, and health-related businesses, all with a high concentration of PhDs. There are two other major research universities, namely Duke and NC State, within the Triangle. The Triangle is a booming area for young professionals and was recently ranked at the top of Forbes' best locations for business and careers. The area offers wonderful opportunities for interdisciplinary collaboration and connections both to other academics and to industry. Situated midway between the ocean and the mountains, Chapel Hill area routinely rates near the top in best-places-to-live rankings, with top-notch schools, affordable housing, a warm climate, plentiful nature, sports, and entertainment.

Applicants are expected to have a doctorate in Computer Science or a related discipline and are strongly encouraged to apply by January 9, 2019, but review will continue after that date. Applications along with four letters of recommendation should be submitted to the university.

Applications will be accepted starting December 1, and the application instructions will be available at <https://cs.unc.edu/recruiting/assistant-professor/>. Please note that we cannot accept applications via email. Questions concerning this position may be sent by email to [facultyrecruiting19@cs.unc.edu](mailto:facultyrecruiting19@cs.unc.edu).

The University of North Carolina at Chapel Hill is an equal opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to age, color, disability, gender, gender expression, gender identity, genetic information, national origin, race, religion, sex, sexual orientation, or status as a protected veteran. We strongly encourage applications from women and under-represented minorities.
