

Professor of Data Science with a focus on Deep Learning, Fachhochschule Nordwestschweiz, Switzerland.

Description

Your tasks:

In this position you are in charge of the profiling of the Institute for Data Science in the field of Deep Learning. Your successful work in application-oriented research and your involvement in the education of students in the field of data science contribute to this. Specifically, your tasks include:

- Acquisition and management of application-oriented research projects
- Assuming personal responsibility for employees of the Mittelbau
- Supervision of student projects (Bachelor and Master)
- Teaching in subject-specific specialization and possibly in basic modules
- Establishment and support of continuing education courses in your area of expertise

Your profile:

Required is a university degree in computer science or data science, preferably with a doctorate. Next you have:

- Proven expertise in the technology and application of deep learning
- Willingness and ability to actively acquire projects with partner companies from the economy, combined with a suitable personal network
- Enthusiasm for teaching and interest in new forms of teaching and learning
- Teamwork, creativity and innovation

Our offer: Thanks to good networking in research, the Institute for Data Science is very successful and well-positioned in teaching. It offers an attractive, supportive and team-oriented environment both during the introduction and in the further profiling and stands for great individual scope of the employees, combined with correspondingly high demands.

Your application

You can send Alberto Tagliatti, HR-responsible, online until 31.12.2019 via the following button. For more information please contact Prof. Dr. med. André Csillaghy, Director, T +41 56 202 76 85, e-mail: andre.csillaghy@fhnw.ch.
